1. INTRODUCTION

The purpose of this test plan is to outline the strategy, objectives, and scope for testing the **Academy Bugs**(<https://academybugs.com>)e-commerce website. This demo e-commerce store enables users to browse products, add items to their cart, register or log in, and place orders. The primary focus is to identify functional defects and UI inconsistencies while ensuring a smooth user journey from product discovery to checkout.

2. TEST OBJECTIVES

- Ensure the user can browse items smoothly
- To verify that core e-commerce functionalities (Login, Search, Cart) work as expected.
- To ensure the website is responsive across different browser window sizes.
- To identify defects in the system.
- To ensure the application meets functional requirements.
- Ensure user-friendly navigation and layout

3. SCOPE OF TESTING

3.1 Features to be Tested

- **User Account Management:** This includes registration, log in, and updating profile information.
- **Product Discovery:** Features category navigation, a search bar, and sorting filters to help users find products easily.
- **Product Detail Page:** Displays the product description and price details.
- **Shopping Cart:** Allows users to add or remove items, update quantities, and calculate total prices.
- **Checkout Workflow:** Involves entering shipping information and processing payment.
- **UI/UX:** Focuses on alignment, consistent fonts, and efficient image loading to enhance user experience.

3.2 Features not to be Tested

- Security Testing
- Backend Database Testing
- Actual payment processing

4. APPROACH

- **Testing Type:** Manual Testing
- **Testing Levels:**
 - Functional Testing - Functional testing is a type of software testing that focuses on verifying that the software functions according to specified requirements.
 - UI Testing
 - Usability Testing - Usability testing assesses how user-friendly, efficient, and effective the application is for end-users.
- **Test Design Techniques:**
 - Black Box Testing - Testing will be conducted manually without looking at the source code.

5. TEST ENVIRONMENT

- **Website:** <https://academybugs.com/>
- **Browser:** Chrome / Edge
- **Devices:** mobile / desktop
- **Operating System:** Windows 11
- **Internet:** Stable connection required

6. RISKS AND MITIGATION PLAN

Risks:

- The demo site data resets periodically.

- The site may experience slowdowns or temporary unavailability.
- Some features may not function fully due to demo limitations.
- There is limited control over the backend in the demo environment.

Mitigation Plan:

- Repeat failed tests to verify defects.
- Execute tests during stable internet connections.
- Document all issues clearly.
- Focus solely on frontend functionality.

7. ROLE AND RESPONSIBILITIES

Role	Responsibilities
Test Manager	Prepare test plan
QA Tester	Execute test cases
Developer	Fix bugs
Project Manager	Monitor progress

8. ENTRY CRITERIA

- Requirements are available
- Test environment is ready
- Application URL is accessible
- Test cases are prepared

9. EXIT CRITERIA

- All critical test cases have been executed.
- Critical bugs were identified and reported.

- The test report has been prepared.

10. DELIVERABLES

- Test Plan Document
- Test Case Document
- Bug Report
- Test Summary Report

11. CONCLUSION

This test plan is designed to facilitate comprehensive testing of the Academy bugs demo website, enabling the identification of potential defects and ensuring that the application meets the expectations of end users. This will contribute to a more reliable and user-friendly experience.
